

CRYPTO PROJECT RESEARCH REPORT

OFFICIAL TRUMP

(\$TRUMP)

Deep-Dive Analysis | June 2026 | NBZ / NASIR

A comprehensive, independently researched analysis of Official Trump (\$TRUMP) covering Team & Creators, Technology, Tokenomics, Market Overview, Use Cases, Competitors, Recent News & Investment Risk Assessment — sourced from verified and up-to-date public data.

Research by NBZ / NASIR

01 · PROJECT OVERVIEW

FIELD	DETAIL
Project Name	Official Trump / OFFICIAL TRUMP
Token Ticker	\$TRUMP
Blockchain	Solana (primary) · TRON (secondary, added 2025)
Token Type	Meme coin / Political collectible — NOT classified as a security by the SEC
Launched	January 17, 2025 — three days before Trump's second presidential inauguration
Issuing Entities	CIC Digital LLC (Trump Organization affiliate) · Fight Fight Fight LLC (led by Bill Zanker)
Website	gettrumpmemes.com
Contract (Solana)	6p6xgHyF7AeE6TZkSmFsko444wqoP15icUSqi2jfGiPN
Contract (TRON)	TXZQuyCasxN42bjAcYpP2xwYVMCF6gHBnv
Total Supply	999.99M TRUMP (~1 Billion — fixed)
Launch Circulation	200M TRUMP (20%) unlocked at TGE
Current Circulation	~237.41M TRUMP (23.74% of total — June 2026)
Current Focus	Community events, Trump Billionaire Game, Canary Capital ETF filing, \$200M treasury plan

Official Trump (\$TRUMP) is the only meme coin officially endorsed by President Donald J. Trump, launched on January 17, 2025 — precisely three days before his second inauguration — on the Solana blockchain. Unlike utility tokens or DeFi protocols, \$TRUMP was explicitly designed as a cultural and political statement: a digital collectible celebrating Trump's 'Fight Fight Fight' moment from the July 2024 assassination attempt, when he raised his fist to the crowd after being shot.

Two Trump-affiliated entities control the project: CIC Digital LLC, a direct Trump Organization affiliate responsible for licensing the Trump brand for crypto purposes, and Fight Fight Fight LLC, run by Bill Zanker — a longtime Trump business associate. Together, these two entities own 80% of the total TRUMP supply and receive all trading revenue generated from \$TRUMP activity — a structure that has drawn significant political and ethical scrutiny from US legislators.

The SEC subsequently confirmed the coin does not qualify as a security under federal law, classifying it as a speculative commodity. The token's launch timing was deliberate: timed to coincide with inauguration week, it drove the market cap to nearly \$27 billion within hours — briefly making \$TRUMP one of the 20 largest crypto assets in the world.

02 · TEAM & CREATORS

NAME / ENTITY	ROLE	BACKGROUND
Donald J. Trump	Endorser & Brand Owner	45th & 47th US President. Announced \$TRUMP on X and Truth Social on Jan 17, 2025: 'My NEW Official Trump Meme is HERE!'
CIC Digital LLC	Co-Issuer / Brand Licenser	Trump Organization affiliate. Licenses Trump name and likeness for crypto. Holds majority of insider token allocation. Receives trading revenue.
Fight Fight Fight LLC	Co-Issuer / Operator	Led by Bill Zanker — Trump's longtime business associate. Manages day-to-day operations and events. Receives trading revenue from all \$TRUMP activity.
Bill Zanker	CEO, Fight Fight Fight	Entrepreneur and Trump associate. Co-authored 'Think Big and Kick Ass' with Trump (2007). Leads the \$200M–\$1B treasury fundraising initiative.
Celebration Cards LLC	Parent Entity	Owner of Fight Fight Fight LLC. Receives trading revenue from \$TRUMP card activity as disclosed in official project terms and conditions.

The creator structure behind \$TRUMP is unlike any other crypto project in history: the token's primary brand value comes entirely from a sitting US President's personal endorsement and the licensing of his name, image, and likeness. This is both its greatest asset and its most significant structural risk — the token's market performance is inextricably tied to one individual's political fortunes and continued engagement.

The ownership structure of Fight Fight Fight LLC runs through multiple corporate layers — described as 'difficult to trace through multiple corporate filings that obscure its principals' by investigators — which has added to the ethical scrutiny the project faces from US legislators. Bill Zanker has maintained a relatively low media profile despite managing one of the highest-profile meme coin projects in crypto history.

03 · TECHNOLOGY & INFRASTRUCTURE

COMPONENT	DESCRIPTION
Primary Blockchain	Solana — high-throughput Layer 1; sub-second finality; 65,000 TPS capability
Secondary Chain	TRON — added 2025 via Justin Sun partnership; swap available on sun.io
Token Standard	SPL Token (Solana Program Library) — Solana's standard fungible token format
Smart Contracts	Standard SPL token contract; no complex DeFi logic — straightforward meme coin
Purchase Methods	Moonshot (debit/credit card, Apple Pay, Venmo, USDC); Raydium DEX; Phantom wallet
DEX Trading	Raydium (Solana) · sun.io (TRON) — primary on-chain liquidity venues
CEX Listings	Binance, OKX, Bybit, MEXC, Gate.io, Robinhood (preferred event qualification platform)
Wallet Support	Phantom (primary) — all major Solana-compatible wallets supported
SEC Classification	Speculative commodity — NOT a security under federal law (SEC confirmed)
Utility Features	Trump Billionaire Game (iOS, May 5, 2026) · Mar-a-Lago events · NFT rewards
Cancelled Feature	Official Trump Wallet (with Magic Eden) — cancelled June 2025 due to WLFI conflict
Latest Dev Update	Contract migration March 17, 2026 ('DLSS 5 Trump') — minimal active development

From a purely technical standpoint, \$TRUMP is one of the simplest tokens in the top 100 crypto assets — a standard SPL token on Solana with no smart contract complexity, no DeFi functionality, no staking mechanism, and no on-chain governance. Value is driven entirely by brand association, community sentiment, and political narrative rather than any technical innovation.

Solana was a deliberate choice: its low fees, fast finality, and existing meme coin infrastructure made it ideal for high-volume retail speculation. The Moonshot on-ramp — accepting Apple Pay, debit cards, and Venmo — was specifically designed to minimise friction for non-crypto-native Trump supporters. The planned Official Trump Wallet was cancelled in June 2025 after a conflict with World Liberty Financial, representing a meaningful setback to any utility roadmap.

04 · USE CASES & REAL-WORLD APPLICATIONS

USE CASE / APPLICATION	STATUS
Political Collectible — digital expression of support for Trump; cultural statement, not investment	Core purpose — live
Community Membership — holding grants access to Trump community, brand events and ecosystem	Live
Mar-a-Lago Gala Events — top 297 holders qualify for exclusive conference & VIP dinner with President Trump	2nd event: Apr 25, 2026
VIP Presidential Access — top 29 holders receive private reception & champagne toast with Trump	Event-based — live
Trump Billionaire Game — iOS mobile game (May 5, 2026); \$TRUMP used as in-game currency and rewards	Live — Apple App Store
TRUMP NFT Rewards — limited edition NFTs issued as compensation if events are cancelled	Live — contingency
Trading Revenue Stream — CIC Digital & Fight Fight Fight LLC earn revenue from ALL \$TRUMP trading activity	Ongoing — live
Canary Capital Spot ETF — first political meme coin ETF filed with SEC; institutional access vehicle	Under SEC review
\$200M–\$1B Treasury Plan — Fight Fight Fight LLC fundraising to buy TRUMP and support price	In development
TRON Chain Integration — tradeable on TRON via sun.io; expanded Justin Sun's ecosystem	Live

\$TRUMP's primary function is as a prestige access token: the more you hold, the closer you get to the President of the United States. This 'pay-to-meet-the-president' model is simultaneously the central ethical controversy and the most powerful demand driver the token possesses. The Mar-a-Lago events have produced clear market impact — the March 2026 gala announcement triggered a 43% price surge within 24 hours — though these rallies have consistently failed to hold above pre-event baselines once the catalyst fades.

05 · COMMUNITY & ECOSYSTEM

METRIC	DATA
Official Social	@GetTrumpMemes on X · Trump announced via @realDonaldTrump & Truth Social
Community Profile	One of the largest politically-themed crypto communities globally — US retail focused
Mar-a-Lago Gala 1	May 22, 2025 — top 220 holders; Justin Sun attended as top holder; ~\$148M cumulative holdings required
Mar-a-Lago Gala 2	April 25, 2026 — top 297 holders; top 29 get VIP champagne reception with President Trump
Physical Gifts (Gala 2)	Trump Fragrance, commemorative poster, trading cards, Fight Fight Fight Red Beauty Watch
Notable Top Holder	Justin Sun (Tron founder) — confirmed top holder at Gala 1; 1.4M+ TRUMP tokens (~\$19M at event)
Preferred Exchange	Robinhood — listed as the preferred trading platform for holder event leaderboard qualification
Trump Billionaire Game	iOS game (May 5, 2026, Apple App Store) — \$TRUMP integrated as in-game asset and rewards
Easiest Purchase Route	Moonshot.money — Apple Pay, Visa, Mastercard, Venmo, USDC, or direct SOL swap
Political Opposition	Senators Warren, Schiff & Blumenthal sent formal investigation letters in April 2026
Community Sentiment	Deeply polarised — strong retail/political support vs. significant institutional & Congressional opposition

The \$TRUMP community is simultaneously a fan club, a political movement, and a speculative trading community — a combination unique in crypto history. The Mar-a-Lago events represent the most unusual community engagement mechanism ever deployed: tying physical access to a sitting head of state directly to token holdings. Senators Warren and Schiff formally investigated the April 2026 event, calling it 'pay-to-play access' — a label that, regardless of its political framing, accurately describes the token's core real-world utility.

06 · INVESTORS & PARTNERSHIPS

Unlike traditional crypto projects, \$TRUMP has no formal venture capital investors — launched directly by Trump-affiliated entities without external institutional backing. The investor landscape is instead defined by notable individual accumulators and post-launch institutional interest.

ENTITY / INDIVIDUAL	TYPE	DETAILS
CIC Digital LLC	Co-Issuer	Trump Organization affiliate. Co-owner of 80% insider supply. Receives all trading revenue from \$TRUMP activity.
Fight Fight Fight LLC	Co-Issuer	Led by Bill Zanker. Co-owner of 80% insider supply. Currently raising \$200M–\$1B to establish TRUMP digital asset treasury.
Justin Sun	Top Holder	Tron founder. Confirmed top holder at Gala 1. Pledged \$100M in TRUMP purchases. Later filed lawsuit vs. World Liberty Financial (April 2026).
Canary Capital	Institutional	Filed first-ever spot TRUMP ETF with SEC. Also registered Trump Coin ETF in Delaware. Under regulatory review.
Osprey Funds	Institutional	Filed competing TRUMP ETF proposal with SEC — decision pending.
REX Shares	Institutional	Third competing TRUMP ETF filing — adds to institutional demand pipeline if approved.
World Liberty Financial	Related Entity	Separate Trump family DeFi venture. Planned collaboration with Fight Fight Fight LLC collapsed; Justin Sun lawsuit followed.
Robinhood	Exchange Partner	Listed as preferred trading platform for TRUMP holder event leaderboard qualification.

Canary Capital's SEC filing for a spot TRUMP ETF is the most significant institutional development post-launch. If approved, this would create a regulated investment vehicle allowing traditional finance participants to gain TRUMP exposure without holding the token directly — potentially a major new demand channel. Justin Sun's trajectory from top holder to WLFI lawsuit plaintiff in under a year illustrates the volatile intersection of crypto, politics, and personal finance that defines the broader Trump crypto ecosystem.

07 · TOKENOMICS

PARAMETER	DETAIL
Token Symbol	TRUMP
Token Standard	SPL Token (Solana) · TRC-20 (TRON)
Total / Max Supply	999,990,000 TRUMP (~1 Billion — fixed, no minting)
Launch Circulation	200,000,000 TRUMP (20%) at TGE — January 17, 2025
Current Circulation	~237,414,040 TRUMP (23.74% — June 2026)
Insider Holdings	800,000,000 TRUMP (80%) — held by CIC Digital LLC & Fight Fight Fight LLC
Full Unlock Timeline	Through 2028 — 3-year vesting schedule from January 2025
Trading Revenue	CIC Digital LLC & Fight Fight Fight LLC receive revenue from ALL \$TRUMP trading
Vesting Extension	April 2025: team delayed initial cliff + 3 months of unlocks by additional 90 days
SEC Classification	Speculative commodity — not a security under federal law

ALLOCATION	%	TOKENS	VESTING SCHEDULE
Creators & CIG Digital 1	36%	360M	10% after 3-month cliff; 24-month daily linear vesting
Creators & CIG Digital 2	18%	180M	25% after 6-month cliff; 24-month daily linear vesting
Creators & CIG Digital 3	18%	180M	25% after 12-month cliff; 24-month daily linear vesting
Creators & CIG Digital 4	4%	40M	3-month cliff; 24-month daily linear vesting
Creators & CIG Digital 5	2%	20M	6-month cliff; 24-month daily linear vesting
Creators & CIG Digital 6	2%	20M	12-month cliff; 24-month daily linear vesting
Liquidity Provisioning	10%	100M	Available for market liquidity support
Public Distribution	10%	100M	Available at launch — January 17, 2025
TOTAL	100%	~1B	Full circulation complete approximately 2028

\$TRUMP's tokenomics are defined by extreme insider concentration. With 80% of total supply held by two Trump-affiliated entities, for every token in public hands there are approximately 3.4 insider-controlled tokens scheduled to unlock through 2028. This creates a structural supply overhang that exerts persistent downward pressure whenever insider entities choose to liquidate. The July 2025 unlock alone released \$900M worth of tokens into the market.

The April 2025 vesting extension — delaying the initial cliff and three subsequent months of unlocks by 90 additional days — provided temporary relief and confirmed the team actively manages unlock timing in response to market conditions. The proposed \$200M–\$1B treasury fund aims to create offsetting buying pressure against future vesting releases.

08 · MARKET OVERVIEW

METRIC	DATA
Token Symbol	TRUMP
24h Price Range	\$1.609 – \$1.684 (June 11, 2026)
Market Cap	\$389.71M (June 11, 2026 — CoinMarketCap)
Unlocked Market Cap	\$1.05B (based on unlocked circulating supply)
Fully Diluted Val.	\$1.64B (based on total ~1 Billion supply)
24h Trading Volume	\$173.39M (June 11, 2026)
All-Time High	\$75.35 — January 19, 2025 (two days after launch)
All-Time Low	~\$1.208 (CMC) · ~\$2.73 (March 12, 2026 pre-gala announcement)
Current vs ATH	~97.8% below all-time high
Circulating Supply	237.41M TRUMP (23.74% of total max supply)
Max Supply	999.99M TRUMP
CMC Rank	#89 (June 11, 2026)
Peak Market Cap	~\$27 billion (January 19, 2025 — within 48 hours of launch)
Exchange Listings	Binance, OKX, Bybit, MEXC, Gate.io, Robinhood, Raydium (DEX)
Binance Yield	5.24% (CoinMarketCap, June 2026)

\$TRUMP's market history is one of the most extreme in crypto: from ~\$0.18 at launch to an all-time high of \$75.35 in 48 hours — a 41,800% gain — before an extended collapse toward its all-time low. The peak market cap of ~\$27 billion briefly placed \$TRUMP among the world's 20 largest crypto assets. The subsequent 97.8% decline from ATH reflects three converging forces: continuous insider unlock pressure, fading inauguration narrative, and the absence of any fundamental utility to anchor a valuation floor.

The pattern of event-driven recoveries — May 2025 gala announcement (+70%), March 2026 gala announcement (+43%) — confirms \$TRUMP trades primarily on narrative catalysts. At current prices (~\$1.60), the fully diluted valuation of \$1.64B implies a premium that can only be justified by the brand value of a sitting US President — a non-replicable moat entirely dependent on one individual's continued political relevance and engagement.

09 · COMPETITORS & MARKET POSITION

PROJECT	TYPE / CHAIN	MKT CAP (APPROX)	VS \$TRUMP
Dogecoin (DOGE)	OG Meme · Dogecoin	\$25B+	Far larger; Elon Musk brand; uncapped supply; no political concentration risk
Shiba Inu (SHIB)	Meme · Ethereum	\$7B+	Ecosystem (ShibaSwap); community-driven; fairer distribution than TRUMP
Pepe (PEPE)	Meme · Ethereum	\$3B+	Pure internet culture; no political ties; no insider concentration
WIF (dogwifhat)	Meme · Solana	\$700M+	Solana-native like TRUMP; community-driven; near-zero insider supply
BONK	Meme · Solana	\$1B+	Community airdropped; fair launch; strong Solana DeFi utility
MELANIA	Political · Solana	~\$35M	Launched Jan 20, 2025 (3 days after TRUMP); 95% supply unlocked; ~98% below ATH — closest structural parallel to TRUMP's future trajectory
MAGA Coin	Political · Ethereum	Small cap	Community-created 2023; no official Trump endorsement; more distributed supply
OFFICIAL TRUMP	Political · Solana	\$389M	Only official presidential meme coin — unique brand moat; extreme 80% insider concentration

\$TRUMP's competitive position is simultaneously unique and paradoxical. No other meme coin has the endorsement of a sitting head of state — this is a genuine non-replicable brand moat. However, when compared to community-launched Solana meme coins like WIF and BONK, \$TRUMP's structural disadvantage is clear: 80% insider supply vs near-zero insider concentration creates persistent sell pressure that community coins do not face.

MELANIA — launched just three days after \$TRUMP with a similar insider-heavy structure — now trades 98% below its ATH with approximately 95% of supply unlocked. This is the most directly relevant forward-looking case study for what \$TRUMP's own unlock trajectory may produce as vesting extends through 2028.

10 · RECENT NEWS & UPDATES (2025–2026)

DATE	EVENT
Jun 2026	TRUMP trades at ~\$1.60–\$1.68 (CMC); ranked #89; 24h volume \$173M. Down ~97.8% from ATH of \$75.35.
Apr 2026	Senators Warren, Schiff & Blumenthal formally investigate Mar-a-Lago Gala 2 — request documents from Fight Fight Fight LLC over pay-to-play presidential access concerns.
Apr 2026	Justin Sun files lawsuit vs. World Liberty Financial in California federal court — alleges illegal token freeze of his WLFI holdings. Eric Trump publicly dismisses as 'meritless.'
Apr 25, 2026	Mar-a-Lago Gala 2 takes place — top 297 holders attend. Top 29 receive VIP reception with President Trump. Gifts: Trump Fragrance, Red Beauty Watch, trading cards, commemorative poster.
Mar 2026	Gala 2 announcement triggers 43% price surge in 24 hours. TRUMP had just hit ~\$2.73 all-time low before announcement. Token migration to new contract referenced as 'DLSS 5 Trump.'
May 2026	Trump Billionaire Game launched on Apple App Store (May 5, 2026) — \$TRUMP integrated as in-game asset and rewards currency.
Early 2026	Fight Fight Fight LLC announces \$200M–\$1B treasury fundraising plan to buy TRUMP tokens and create sustained buying pressure. Led by Bill Zanker.
Jan 2026	TRUMP recovers in broader market rally. Canary Capital, Osprey Funds, and REX Shares all file competing spot TRUMP ETF applications with the SEC.
Jul 2025	\$900M unlock event — 90M tokens released across four Trump-controlled groups. Justin Sun announces \$100M TRUMP purchase commitment to help absorb supply.
Jun 2025	Official Trump Wallet development (with Magic Eden) cancelled — conflict with World Liberty Financial cited as reason for cancellation.
May 22, 2025	Gala 1 at Trump National Golf Club (Virginia) — top 220 holders attend private dinner with Trump. Justin Sun confirmed as top holder. Required ~\$148M cumulative holdings to qualify.
Apr 2025	Team extends vesting schedule — initial cliff + 3 months of daily unlocks delayed by 90 days to reduce market sell pressure.
Jan 19, 2025	TRUMP hits ATH of \$75.35. Peak market cap ~\$27 billion. Price surged from ~\$0.18 at launch to \$75+ in 48 hours — an 41,800% gain.
Jan 17, 2025	Official launch on Solana. Trump announces on X and Truth Social: 'My NEW Official Trump Meme is HERE!' Gate.io Launchpool staking begins (Jan 18–22).

The \$TRUMP timeline is a case study in politically-driven crypto volatility compressed into months rather than years. The recurring event-announcement-rally-fade pattern (May 2025 gala, March 2026 gala announcement) reveals a market that lacks organic demand and depends on artificial narrative injections to generate buying pressure. The Justin Sun storyline — from top holder and dinner guest to WLFI lawsuit plaintiff in under a year — encapsulates the volatile intersection of crypto, politics, and personal finance that defines \$TRUMP.

11 · INVESTMENT POTENTIAL & RISKS

▲ BULLISH CASE	▼ BEARISH RISKS
+ Only official presidential meme coin in history — non-replicable brand moat	- 80% insider supply (800M tokens) vesting through 2028 — persistent structural sell pressure
+ Direct Trump endorsement creates unparalleled cultural resonance with large US retail base	- 3.4 insider tokens exist for every 1 token in public hands — extreme concentration
+ Event-driven demand mechanics (Mar-a-Lago) create recurring periodic price catalysts	- Zero fundamental utility — value entirely dependent on brand narrative and event catalysts
+ Three competing TRUMP ETF filings (Canary Capital, Osprey, REX) — institutional pipeline building	- Official Trump Wallet cancelled — only utility roadmap item abandoned
+ SEC classified as commodity not security — regulatory clarity vs. most crypto tokens	- Justin Sun lawsuit vs. WLF1 reveals instability within Trump's own crypto ecosystem
+ \$200M–\$1B treasury plan could create sustained buying pressure if successfully funded	- Senators Warren, Schiff, Blumenthal actively investigating — political/legal risk ongoing
+ Trump Billionaire Game (May 2026) introduces first in-app utility for the token	- MELANIA precedent: same structure, now 98% below ATH with 95% supply unlocked
+ Listed on Robinhood — accessible to mass US retail market without a crypto wallet	- Price entirely correlated with Trump's political relevance — single-person dependency
+ 97.8% below ATH — asymmetric upside if major political catalyst reignites narrative	- Event-driven rallies consistently fail to hold — no sustainable demand floor established
+ TRON integration broadened distribution into Asian retail markets via Justin Sun	- No independent technical development team — evolution entirely dependent on Trump org

RISK FACTOR	DETAIL
Supply Unlock Risk	800M insider-controlled tokens vest through 2028. July 2025 alone saw \$900M in unlocks. Each vesting event expands circulating supply by multiples of organic demand — structural downward pressure.
Single-Person Risk	\$TRUMP's entire value thesis depends on Donald Trump remaining politically active and engaging with the token. Any change in his political status removes the primary demand driver immediately.
Utility Vacuum	Cancellation of the Official Trump Wallet leaves \$TRUMP with no embedded utility beyond community membership and event access. Without utility, the token cannot attract DeFi users or developers.
Regulatory Risk	Congressional investigation into pay-to-play presidential access may result in legislation targeting politician-endorsed meme coins. A hostile regulatory outcome could directly impair the core value proposition.
Ecosystem Risk	The Justin Sun / WLF1 lawsuit revealed that Trump's multiple crypto ventures can conflict with each other — destabilising the broader Trump crypto ecosystem and damaging all related tokens.
Liquidity Risk	Despite \$173M/24h volume, much of \$TRUMP trading is speculative. In a risk-off environment without narrative catalysts, volume can collapse rapidly — large positions difficult to exit without slippage.
MELANIA Precedent	\$MELANIA launched 3 days after \$TRUMP with a similar insider-heavy structure — now 98% below ATH with ~95% of supply unlocked. This is the most direct forward-looking case study for \$TRUMP's trajectory.

NBZ RESEARCH VERDICT

Official Trump (\$TRUMP) is unlike any other crypto asset ever researched: simultaneously the most politically powerful meme coin in existence and one of the most structurally compromised tokens in the top 100. The brand moat — a sitting US President's personal endorsement and willingness to meet top holders at Mar-a-Lago — is genuinely non-replicable and capable of generating explosive short-term moves. But the structural realities are unforgiving: 800 million insider-controlled tokens vesting through 2028, zero independent utility, a cancelled wallet roadmap, ongoing Congressional investigations, and a MELANIA precedent showing exactly what happens when political narrative fades and insider supply floods the market. At ~\$1.60 and 97.8% below ATH, \$TRUMP offers asymmetric upside only if a major catalyst reignites the narrative before the next wave of insider unlocks. This is a pure speculation play on political brand value, not a crypto investment in any traditional sense. Size accordingly. **Not financial advice.**
